# FCCM 2015 – VANCOUVER, BC, CANADA

## DEMO NIGHT INVITATION

Dear Potential FCCM Demo Night Presenter,

The pre-eminent North American technical conference in reconfigurable computing is the IEEE Symposium on Field-Programmable Custom Computing Machines, FCCM. This year, our 23<sup>rd</sup>, FCCM will be held in Vancouver, British Columbia, Canada. FCCM-2015 will take place on Sunday May 3, 2015 through Tuesday May 5, 2015 at the downtown [Vancouver Marriot Pinnacle](#) hotel. There will be a workshop on Sunday and the FCCM-traditional Demo Night on Monday. We select the best papers and posters from over a hundred submissions of the latest work in reconfigurable computing technology.

Each year we have an informal show-and-tell called Demo Night. This year it's Monday evening, May 4, 2015 at 6pm. Paper and poster authors and commercial vendors bring their FCCMs, hardware, gateware, slideware, software, tools, chips, and set up demos. Attendees circulate, enjoy the demos, and engage with the presenters while enjoying the food and drink at this stand-up and learn event. It's always informative for demoers and demoees, great networking, and lots of fun too.

For commercial vendors, it is a fine opportunity to meet with the leaders in this field, including prospective customers and soon-to-be-graduating future employees, in an informal setting.

While you will surely find it worthwhile to register and participate in FCCM, it's not required to exhibit at Demo Night, nor is there any fee for registered conference attendees or sponsors.

If you wish to present at Demo Night, just register by sending an email to Shep Siegel. We will reserve a 6-foot table for you with a power outlet and wireless internet access.

Hope to see you in Vancouver.

Kindly,

Shep Siegel, Exhibits and Sponsorship Chair [shepard.siegel@atomicrules.com](mailto:shepard.siegel@atomicrules.com)

On behalf of

Lesley Shannon, FCCM 2015 General Chair  
and the entire FCCM 2015 program committee.
