

2026

CALL FOR PAPER

The 34th IEEE International
Symposium On
Field-Programmable
Custom Computing Machines

ABOUT FCCM

- **FCCM** is the premier conference for **customizable computing systems**
- Welcome work **across all layers** to drive performance, efficiency, and innovation

TOPICS OF INTEREST

- **Custom architectures:** FPGAs, CGRAs, chiplets, analog/digital hybrids, neuromorphic
- **Design tools:** EDA tools, LLM-based designs, domain-specific languages, debug and productivity tools
- **Runtime systems:** scheduling, resilience, dynamic reconfiguration, autonomy
- **Security:** side-channel protection, secure reconfiguration, hardware defenses
- **Applications:** AI/ML, quantum, digital twin, embedded, safety systems

IMPORTANT DATES

- **Abstract :** January 10, 2026
- **Full Paper:** January 17, 2026
- **Rebuttal:** February 23–27, 2026
- **Notification:** March 16, 2026

INVOLVED BEYOND PAPERS

- **Workshops & Special Sessions:** Build your own theme & proceeding
- **Demo Night:** show your designs, tools & products — fun & interactive
- **Ph.D. Forum:** Share early ideas & connect with peers
- **New! Student Design Competition:** Compete & present your design at FCCM & get awards
